

**In the Abstract:**

Please amend the Abstract as follows:

~~The invention relates in particular to an eyeglass frame (1) which is distinguished by the fact that it contains a first (32) and second (33) semi-shell shaped earpieces, rotationally linked to a first (2) and second (3) hinge that are linked to a frontal piece (27) and/or at least one lens, the earpieces can close to form a shell to temporarily hold the frontal piece and/or at least one lens.~~ An eyeglass frame includes a first and second semi-shell shaped earpieces, rotationally linked to a first and second hinge. The hinges are linked to a frontal piece having at least one lens. The earpieces close to form a shell to temporarily hold the frontal piece and the lens.
